

# 2010 FALL TREE & PLANT SALE

Thank you for your interest in the Conservation District tree & native plants program. Your purchases support conservation work by the Washtenaw County Conservation District. Trees, plants and other materials are intended for such conservation uses as: reforestation, soil erosion control, windbreaks, screens and wildlife habitat improvements. It is unlawful for these trees, and other plants to be resold with the roots attached, in accordance with the Insect Pest and Plant Disease Act, P.A. 189 of 1931, as amended.

**TO PLACE AN ORDER:** Complete the "2010 Fall Tree & Native Plants Order Form" and submit with **FULL PAYMENT**, including **SALES TAX** by **SEPTEMBER 24, 2010**, to the District Office. Orders will be confirmed by e-mail and post card before pick-up.

Inventories are limited and orders will be filled on a first-come, first-served basis. Order early for best availability.

**PAYMENT METHODS ACCEPTED:** Payment by cash, check or credit/debit card will be accepted, as listed below.

- By mail or in-person with check, money order or credit/debit card.
- By fax with credit/debit card.
- No phone orders accepted.

**PICK-UP DATE & LOCATION:** **FRIDAY, OCTOBER 8, 9 a.m.- 6 p.m.** at a location to be determined. Notification of pick-up location will be provided by e-mail and on order confirmation post cards. If you cannot make this date, contact the District Office for other pick-up arrangements.

**IMPORTANT:** Trees and plants will be delivered in good condition. The District does not guarantee survival of trees and plants. District liability ends after trees or plants are presented to the buyer.

**EXTRA TREES & PLANTS:** Any extra trees and plants will be sold during order pick-up at the pick-up location.

**REFUND POLICY:** Orders cancelled 10 days prior to last day orders are accepted will receive a full refund. No refunds will be given on orders not picked up, unless trees or plants can be resold. All trees or native plants remaining 1 week after pick-up may be sold.

District reserves the right to cancel orders and provide refunds for reasons beyond our control.

## TREE PLANTING AIDS

### **Plantskydd Animal Repellent**

This all-natural, non-toxic repellent provides effective protection against deer, rabbits and other small herbivore critters. Lasts up to 6 months over winter on dormant plants, and 3-4 months during the active growing season. Repels by odor not taste and will not harm animals. Apply to conifer & hardwood trees, fruit trees, shrubs, ornamentals and flowers. The 1-qt. ready-to-use liquid spray bottle treats 80-100, 1 ft. high plants. The 1-lb. soluble powder box treats 200-300 1 ft. high plants, applied as a spray with a pressurized hand-held or backpack type sprayer. The 1.32-gal. jug treats 400-600 1 ft. high plants applied as a spray.

### **Green Screen Deterrent**

A simple and effective way to discourage wildlife damage. Ideal for gardens, orchards, trees and ornamental vegetation. The odor is offensive to deer, rabbits and raccoons. Green Screen is a non-toxic mixture of meat meal (tankage) & red pepper (capsaicin) and is safe for all edible crops up to the day of harvest. No mixing or spraying. Effective for up to 4 months. The 3-lb. box of powder is sprinkled around plants and covers 275-300 square feet. Also acts as a soil enhancement.

### **Marking Flags**

4" X 5" fluorescent red plastic flag on 36" wire. Can be used to mark location of planted trees or for other uses. Will last for several seasons. Bundled in quantities listed on order form.

### **Fertilizer Tablets**

Compressed, 10-gram, nutrient-rich starter tablets supply all the nitrogen, phosphorus and potash needed by seedlings or transplants for 2 years. More nutrients are released during the growing season when bacterial activity is greatest. Very little is released during dormant season. Use 1 tablet per seedling or transplant.

### **Root Dip**

A powder developed specifically for moisture retention, that when mixed with water creates a special gel which clings to a plant's roots and greatly enhances its chances for growth and survival. After mixing, dip tree roots into gel before planting. Root dip is particularly useful for dry soils that have limited moisture retention. A 2-ounce bag will make enough gel to treat about 2,000 seedlings; fewer transplants or plants with larger root masses.
